

Socialसेवा

NGOs work for uplifting the backward sections of the community. Moreover, the major function which is performed by NGOs is to bridge the gap of inequalities and unfair treatments. Additionally, they ardently strive to make the lives of victims and poor people better.

The main idea is to bridge the gap between the people who are willing to support a cause and the NGOs which are helping for that cause.

Just like the role of catalyst is to fasten the reaction, we will try to act as catalyst in supporting the NGOs and the people who wish to support the NGOs.

We aim to create a web portal which helps in shortening the gap between you and the NGOs. It helps you connect to a Non Governmental Organization on the basis of the cause you wish to support.

We will aim to implement the model all over the nation so that more people could help support the cause and the needy people get support from it. Anyone who wish to support for a cause whether it be illiteracy, hunger ,child abuse and many more, he/she can register himself on the portal once he has been verified then he could choose from the list of NGOs and contact them to join.

“Be a reason for somebody’s smile”
